  - Higher Education Guatemala
  - Upgrade Ebenezer Institute Malawi
  - Theological Education Guatemala

We are excited to have your help in an effort to provide additional support and/or funding for these four ministries. As a Presbytery, we have championed their efforts for a number of years and know their service and dedication. This campaign was established specifically to answer the pleas from these ministries for additional assistance in order to grow into the future. This growth will allow each ministry to provide for specific needs and develop and maintain programs and endowments. In an effort to provide as much information about BUILDING H.O.P.E. and how to begin your congregation's involvement, we have provided many ideas for discussion. We encourage you to take this packet of information and prayerfully design a plan that your church will enjoy. Our desire is for everyone in your church to learn more about these ministries and their purpose as missions. We can do together what we cannot do individually.

Faithfully yours,

Linda Rostan and Feild Russell
